Competent Care 4 Challenging Children (CCCC) Program

Families:

*Looking for licensed childcare providers **trained** in autism & other related disorders?*

Need to work, attend school, or get some time for yourself and want to know that your child is well cared for?

Concerned about a caregiver's ability to "get" your child?

Need help with behavior strategies for your child?

Opening Doors for Colorado Families

Autism Society of Colorado introduces a **FREE training program** for family members interested in increasing their success with their child's childcare and/or respite care providers and learning practical strategies to deal with challenging behavior.

The program also includes follow-up support to address individual behavioral strategies needed by the family and/or care providers.

Qualified, autism-trained professionals, supervised by a Family and Marriage Counselor/Behavioral Analyst, staff the program.

The **Competent Care for Challenging Children Program (CCCC)** will assist families to connect to childcare and respite care providers that have been trained in autism and other related disorders.

Yes! I am interested in the CCCC Program!
