Beginners and Intermediate Users

Presented by

Dan Herlihy

September 20, 2010

Boardmaker for Beginners from 8:00am-12pm

Boardmaker for Intermediate Users from 1:00pm to 5:00

Hosted at the

**Shore Family Forum room in the Ben Nighthorse Bldg
Anschutz Medical Campus**

Boardmaker Plus v.6 - Beginner

Are you new to Boardmaker Plus v.6, or have you upgraded from Boardmaker 5 and wonder what else can I do now? In this beginner session learn the basics of creating boards for print, working with your own images, customizing boards and buttons. Then, learn what new interactivity is in this version. Learn how to create basic interactive boards with sounds, prompts, feedback and also capture student responses in a report. Learn how to access, download then import free activities from the Adapted Learning website that you can use as a model to add your own content to. Turn your students' day into one of engagement, interaction, and enhance communication! A CD of sample activities and handouts will be provided.

Boardmaker Plus v.6 - Intermediate

Already know the basics of Boardmaker Plus v.6 and are ready to really get creative? Learn how to create interactive books that can be accessed over and over with different story outcomes and story lines. Then, connect the stories to questions to assess their comprehension, and capture their responses! Since reading and writing go hand in hand, learn how to create accessible, interactive writing activities containing pop-up choices for characters, settings, etc. enabling all your students to write with supports. Learn how to work with actions, message files, pop-ups, invisible buttons, moveable buttons, and more to create interactive and engaging learning activities for your students, all within an accessible environment supporting communication. A CD of sample activities and handouts provided.

Watch for registration information soon!
